PROFESSIONAL EXPERIENCE AND PROJECTS

EY LLP, **Ahmedabad, India**
Senior Analyst – (Business Consulting) 09/25-Present

- Advised 5+ multinational clients across MENA and India in oil & gas, metals, and commodity trading sectors, supporting risk, controls, and process improvement engagements.
- Independently conducted 15+ process walkthroughs for an Indian metals client across O&M and inventory processes, mapping key activities, risks, and controls to support process improvement and control alignment.
- Tested 60+ ICF and ICOFR controls by reviewing evidence, documenting exceptions, and supporting remediation planning, helping clients strengthen governance, control effectiveness, and audit readiness.
- Supported trade surveillance review for a large Saudi-based commodity trading company, assessing MARA, alert monitoring, and surveillance controls to identify compliance gaps and enhancement opportunities.
- Contributed to SOP development and gap assessment for a large Saudi-based metals company, converting process understanding into structured documentation and practical improvement observations.
- Recognised with the Client Extraordinaire Award at EY within the first year, reflecting strong client delivery, ownership, and contribution to high-impact consulting engagements.

Ark Recruitment EST, **Exeter, UK**
Associate Consultant 10/24-11/24

- Delivered client advisory support on workforce and talent strategy by diagnosing hiring inefficiencies and recommending data-backed solutions.
- Conducted structured requirement-gathering and market analysis to support informed decision-making across multiple client engagements.
- Drove measurable outcomes by advising on selection and hiring approaches, contributing to consistent monthly conversions and improved pipeline effectiveness.
- Engaged senior client stakeholders to translate business objectives into practical execution plans, strengthening long-term client relationships.

Trainity,
Data Analyst Trainee 04/23 – 06/23

- Advanced technical proficiency in Python, R, and Excel through intensive data analytics training, enhancing data manipulation and modelling capabilities.
- Executed project tasks to analyse datasets, producing actionable insights that contributed to the company's business intelligence initiatives.
- Partnered with experienced analysts to refine data analysis methods, significantly boosting data accuracy and operational efficiency.
